Subject: Request for an Extension of Time

Dear Mr. Harris;

The Intermountain Rural Electric Association is requesting a 90-day extension to obtain property rights on the land necessary for the Eastern Reliability Upgrade as required by Condition No. 7 in the Approved Resolution 18-22, recorded May, 10, 2018, as Reception No. 577584, Book 786, and Page, 459. The Association was unable to secure easements from four property owners through good faith negotiations and determined that it was necessary to acquire the easements through its statutory power of eminent domain. The Association filed for condemnation, served the applicable property owners, and is proceeding with a motion for immediate possession. The Association hereby respectfully requests a 90-day extension to accommodate the legal process.

Sincerely

Brooks Kaufman
