Subject: Radon Test Report #6835431

=====
05/26/17 ACTIVATED CHARCOAL RADON TEST #6835431

* Radon Test Result = 3.5 pCi/L

* Test Started 05/18/17 at 2:00 pm
* Test Ended 05/22/17 at 10:00 am

* Location Basement

SHAWN CARPENTER
440 COMANCHE AVE
KIOWA, CO 80117

* INTERPRETING YOUR TEST RESULT

The US EPA action level for indoor radon is 4.0 pCi/L. The EPA recommendation for results in this range (2.0 to 3.9 pCi/L) is to conduct further tests to determine the true annual average, ideally with a long-term test kit. If the result remains between 2 and 4 there is little short-term risk, but you should consider fixing your home. Additionally, if you make any structural changes or start to use a lower level of the building more frequently, you should test again.

You may be able to obtain additional information about radon related subjects by calling your state radon officer at 800-846-3986.

Or call the "Radon Fix-It Line" at 800-644-6999 Monday thru Friday between NOON and 8 pm EST.

=====

***** IMPORTANT NOTE ABOUT YOUR TEST RESULTS**

Also note, that if you mailed more than 1 test kit to us, the others should arrive in the next couple of days. It is not uncommon for the USPS to deliver mail sent from the same location at the same time to the same destination on separate days.

If you do not have the PDF viewer installed, you can obtain one for FREE from Adobe Systems Incorporated.
