Senior Environmental Health Specialist

Department: Health and Human Services

Salary: \$4043 - \$4933/month DOQ

Approved: May 2018

FLSA: Exempt

GENERAL STATEMENT OF DUTIES

This position is responsible for provision of environmental health services to the residents of Elbert County. Implements environmental health practices and policies in accordance with County and State requirements; leads or assists in development of health policies for operation of the agency and the protection of public health; advocates and partners with community, county and state colleagues; while providing highly technical and responsible assistance to the community.

ESSENTIAL DUTIES AND RESPONSIBILITIES

- Interprets and enforces Colorado regulations for consumer protection (restaurants and retail markets), child care facilities, schools, camps and emergency situations;
- Responds as required to support public health emergencies, incidents and events. Participates in all exercises and drills on emergency preparedness, as required; completes training identified as appropriate for this level;
- Conducts inspections and investigates the sanitary conditions for compliance of facilities and operations, such as food service establishments, grocery stores, child and health care facilities, jails, solid waste landfills, OWTS, air pollution emission sources, swimming areas, etc;
- Implements CDPHE and Elbert County laws and regulations;
- Drafts for compliance and /or approval, program policies and procedures;
- Investigates environmental health conditions and makes recommendations for compliance with requirements; prepares issuance of orders and instructions to maintain compliance with environmental health requirements of laws, rules and regulations;
- Collects samples for physical, chemical, bacteriological or pathological analysis; performs a variety of field tests to determine proper and safe operation of equipment and facilities;
- Conducts scheduled and non-routine inspections of industrial, commercial, public or private facilities to assure continued compliance with environmental standards; notifies owners or operators of unsafe, inadequate or non-complying conditions and maintains records of contacts made and conditions encountered;
- Explains findings of investigations, field test and laboratory reports to owners and managers of establishments and occupants of premises subject to environmental health requirements; offers technical advice to ensure compliance;
- Performs file data input into computer systems associated with environmental health programs;
- Reviews and recommends approval of plans and specification for most situations; issues permits as appropriate;
- Conducts inspections of construction and equipment installations to ensure compliance with environmental regulations;
- Responds to public complaints and inquiries regarding environmental health subjects and issues; provides resources and information;

- Participates in community outreach activities to promote understanding and support of environmental health programs;
- Collects and analyzes data concerning environmental health related issues;
- Performs environmental assessments of referrals from the Elbert County Community and Development Services for various proposed zoning and/or land use requests and changes;
- Assists in the development of new processes, procedures, and initiatives to better serve Elbert County and its citizens.
- Leads or assists in the performance of epidemiological studies for communicable disease outbreaks;
- Attends on-going training to maintain/enhance knowledge and skills;
- Reviews and interprets various reports such as soils classification, nutrient analysis, percolation and water tests;
- Responsible for zoonotic control functions such as inspections, surveillance, disaster response, rabies biological and animal control ordinances;
- Licenses OWTS installers and contractors to conduct business in Elbert County, may take enforcement actions against the same if necessary;
- Completes other duties as assigned.

SKILLS AND ABILITIES

- Ability to review and interpret various reports such as soils classification, percolation and water tests;
- Must be able to read maps and plat books;
- Must have the ability to prepare accurate document;
- Excellent critical thinking, interpersonal and conflict resolution skills;
- Ability to establish and maintain effective working relationships with community partners;
- Ability to plan, schedule, organize and prioritize workflow to maintain accurate records and meet deadlines;
- Ability to clearly and effectively communicate both orally and in writing;
- Ability to communicate with elected officials when necessary;
- Ability to utilize current technology with proficiency;
- Ability to determine suspicion of fraud or intentional program violations;
- Ability to recognize child and adult protection health issues as it relates to environmental health and safety and report them to the appropriate authorities;
- Ability to safely drive an automobile or van on public roads and highways;
- Ability to remain flexible and sensitive to customers' needs while effectively managing demands with high volume of work and frequent interruptions;
- Demonstrated ability to work independently.

KNOWLEDGE

Broad knowledge of the following: Colorado State Department of Public Health and Environmental rules, regulations, public health and environmental laws and Elbert County policies, procedures and regulations and community resources. Knowledge of zoonotic diseases, microbiology and public health.

RESPONSIBILITY

Reports to the Administrator of Public Health; work is reviewed periodically for results obtained and for compliance to procedures, methods, general conclusions, final results and accuracy on a regular basis through supervisory reviews.

PERSONAL WORK RELATIONSHIPS

This position requires contact and professional communications with citizens, community organizations, medical and other health professionals, members of the agency and local county and state government representatives.

EDUCATION, EXPERIENCE AND CERTIFICATIONS

Requires a Bachelor's Degree from an accredited college or university with a degree in, health or biological sciences; Environmental Health degree preferred.

EXPERIENCE

Five years related experience in environmental public health service delivery.
