REQUIREMENTS

1. Septic Permit **MUST** be applied for **PRIOR** to Building Permit.
2. Soil test and permit fee must be provided at time of application.
3. Entries on application must be legible.
4. Site visit may be conducted.
5. Engineered designed systems will be approved by design engineer.
6. Septic As-built map required for all new tanks, fields or complete systems. Maps must be drawn to scale with a north arrow indicated. System will **NOT** be approved for use until the “As Built” and/or engineer letter are received.
7. Lot must be marked and perk holes marked properly.
8. All payments are non refundable.
9. Installer must be currently licensed in Elbert County.

PROPERTY THAT CONTAIN FLOODPLAINS

If your property contains floodplain, be aware that you may not construct a structure of any kind within the floodplain without first applying for a floodplain permit. This includes ISD systems. Elbert County Zoning Regulations part II, Sec 25, sec C, 5, c states that applicants will be required to:

Locate all new on-site sewage systems (including leach fields) in areas above the base flood elevation; (except the replacement of a failing system where no alternate location outside the floodplain is available.)

Please take this restriction into account when locating a structure on property that contains floodplain.

Please allow 7 – 10 business days for your inspection to be completed. Because of increased requests, we can no longer do same day or next day inspections. Inspections will be by appointment only. Also, please note that Elbert County Offices are closed on Fridays and all major holidays.

I certify that I have read and understand all of the above:
